TRANSPORTATION

WHY CHOOSE OUR SOLUTIONS?

RELIABLE

ATIN provide to you reliable solutions for boosting the performance of your hardware, with support for Edge Storage and failover servers for continuous and uninterrupted access to video.
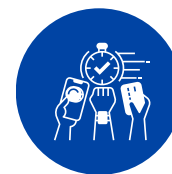

CUSTOMIZABLE

Expand the capabilities of your system based on your organization's needs with leading solutions securely integrated using the open platform Omniscient AI.

FRIENDLY

Centralized search platform, multilayer maps and video wall support assure efficient investigation, intuitive camera navigation and immersive visualized situational awareness when responding to incidents.

SCALABLE

Support for an unrestricted number of servers, cameras and users provides efficient central management of systems of all sizes

SECURE

Reinforce your system's resilience to cyber security threats without compromising people's privacy with an array of built-in security and privacy tools.

CONVENIENT

The camera system detects traffic violations quickly and accurately based on AI technology, without stopping, saving time, convenience, safety and efficiency.

KEY FEATURES
